

# Grainger KeepStock® Inventory Management

## A Complex Process

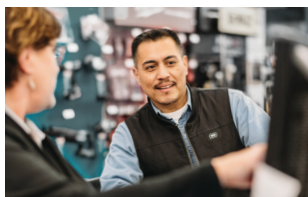

Purchasing and managing your maintenance, repair and operations (MRO) inventory can be complex. The process often consists of numerous product categories and many suppliers, making it difficult and time consuming to keep track of. Ultimately, it can be costing you time and money.

## Common Challenges

Your facility faces unique MRO inventory challenges. What if there were an easier way to ensure you have the right parts, tools and supplies in the right place right when you need them? Ask your Grainger rep how we can help with:

- **Control and visibility of inventory:** Save time spent searching for what you have on your shelves.
- **Production shutdowns and delays:** Avoid downtime when you don't have what you need where you need it.
- **Unknown consumption rates:** Keep tabs on how much you're using.
- **Keep your people focused on the work that matters most:** Drive down the cost of employee time and effort spent managing products and their storage.
- **Continual pressure to reduce spend:** Take control of your inventory and maximize opportunities for savings across your business.

## How Partnering with Grainger Can Help

No matter how big, small or complex your needs, Grainger KeepStock Inventory Management solutions can help take costs out of your facility by increasing visibility, control and insight of your inventory. Our solutions work together to build the best inventory management solution for your business.
